REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art recognizes employing a center post assembly with a valve that is actuated to an open position when the filter is present via an actuator on the filter cartridge end cap (see any one of Dye (US 5855780) or Popoff (US 5770065) or Jiang (US 5846417)). Further the prior art recognizes actuating a check valve ball to open a fluid flow passage (not the center post) which feeds prefilter to a filter housing (see Theorell (US 4303514) or Ensign (US 3363762) or Mittermaier (US 5215655)). However none of the prior art cited teaches employing a center post assembly which is oval, having an oval flange and an oval shaped interior shelf with a movable valve ball in combination with a filter cartridge which employs an oval shaped seal and "blocking means for limiting by movement of the movable valve ball in the direction of the second flow opening". Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas M. Lithgow whose telephone number is 571-272-1162. The examiner can normally be reached on Mon. -Fri..
